

Rotating Sugar Bowl Type ZR-1

(Equipment for Continuous Doughnut Fryer series UFD)

Mobile height-adjustable rotating sugar bowl out of stainless steel to be docked at the running out of the automatic jam injection machine series AG. The sugar bowl serves as a buffer at the end of the complete doughnut frying line and catches lots of doughnuts through the permanent rotation.

The sugar bowl is not fixed and can be replaced with a second bowl.

The rotation speed of the bowl is fully adjustable. Part of delivery are one bowl, main-switch and power cable with plug.

Dimension: bowl-diameter: 600 mm, height: 900 mm

Supply: 230 V / 54 W
